

PROVA 6

Il candidato esponga in forma sintetica ma significativa:

1. le differenze tra un atto di pianificazione urbanistica e un Permesso di Costruire convenzionato.
2. quali sono i documenti contabili per l'opera pubblica.
3. che cosa sono le ordinanze e chi può emetterle.

Informatica

Il candidato esponga la differenza tra un file DWG e un file WORD

Inglese

The first milestone in modern telecommunications was in 1901. A radio message was sent from England to Canada by Guglielmo Marconi, proving that radio could be used for long- distance communication. Commercial radio programmes were produced for the first time in USA and Europe in the 1920s. Soon afterwards, scientists began working on a way to transmit images in a similar way. The first TV transmission (a moving image of a man's face) was made by the Scottish inventor, John Logie Baird in London in 1926.
